# megaInn

## fourSeasons

Drench into a sea of lights! FourSeasons stands for smooth transition from one colour to the next one deriving from the accent illumination of the solarium. The whole cabin gleams brightly and warm. Feel the colours of the four seasons on your skin and relax in comfortable warmth and the colours of the rainbow. Trend setting high Power RGB colour LED technology guarantees powerful illumination as well as a long life of approximately 100,000 hours.

**What a megaHighlight!**

## automatic VolumeControl

The feature aVC controls the volume of the music played in dependence of the performance level of the ventilation. It relieves the user of the solarium of permanent volume adjustment.

**This is megaRelaxing!**

# Innovations

## electronicPower

Save approximately 33 % energy per tube with this new technology including electronic ballasts. However, eP does not only save money, it helps to keep heat creation at a low level and to reduce the weight of the solarium. The weight of new series megaSun 6800 and 7900 α are nearly 100 kg below the ones of comparable solariums.

**That's megaEconomic!**

## USB Audio

Only megaSun provides this feature. Which consists of USB connector outside of the canopy of the solarium providing the opportunity to plug in USB sticks of the customer loaded with his/her favourite music.

**What a megaldea!**

## The sunshine company.

This price list has been effective as of **February 15, 2009**.

All price lists issued prior to this date are no longer valid. The prices listed (in Euro) represent the prices for end consumers. They are based on the quotation 'ex works Dernbach'. We reserve the right to any technical or design modifications as well as changes in price and delivery. All KBL prices stated do not include any timer systems.

Export of KBL tanning systems - specified in this catalog - to the USA and Canada, or operation of the systems in these countries, are not permitted. KBL does not accept any manufacturer's liability in case this direction is not adhered to. It is expressly pointed out that any violation of the export/operation prohibition will involve substantial risks of liability for the exporter and/or operator.

Technical equipment and versions of the Solaria are in accordance with the legal prescriptions of the respective country of destination.

### **Guarantee for KBL-professional Sunbeds**

From the point of delivery of the units and for a duration of 6 months, KBL-Solarien AG guarantees, that by proper use the units are not affected with any mistakes, that may cancel or reduce the value or the ability for an ordinary use (except wear parts like tubes, facials, starters and acrylics). This time span will be extended to 24 months if the guarantee card is filled in and returned within the first four weeks after shipment.

All shipments are based on our general terms of trade.

# megaInn

**Pigment tubes, which are powerful and gentle at the same time, this is what p2 stands for. And what is the benefit for the customer?**

- Perfect tanning results, due to fast creation of melanin
- Vital Bio positive effects, due to the creation of Vitamin D3.
- The relieving feeling that P2-tubes are gentle on the skin.

**megaGentle and megaConfident!**

## cpi energy

The quantum leap with electronic control units of solariums:

- permanent 100 % performance
- less energy consumption than common technique
- Increase in performance by 1100 %
- Longer life of tubes
- Trendsetting, as already jet adjustable to most international standards\*

Adjustment can be easily carried out via display or by pressing a button.

**That's characteristic for megaSun!**

\* except USA and Canada; only possible with the original lamp equipment.

# Innovations

The formula for clever tanning

**intelliSun =**

6 x

**6 times the advantages of p2!**

perfect tanning, creation of vitamin D3,  
gentle on the skin

**controls the output  
of the tubes**

intelliSun i. e. intelligent tanning.

Customers can select between various skin type settings  
matching her/his level of pigmentation the best.

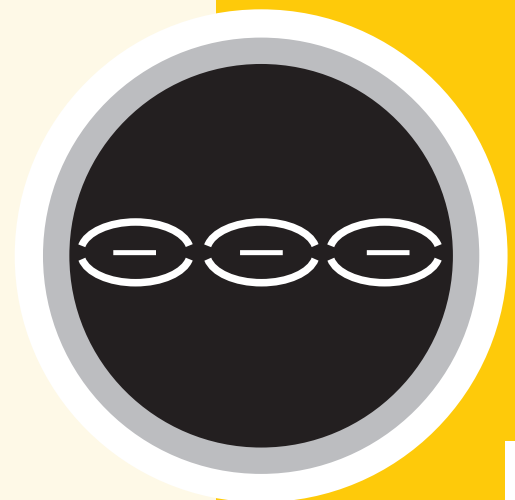

IntelliSun offers the best of the sun for each customer  
within her/his own tanning level (basic, mediterranean, caribic).

## preSelection

More comfort is provided by the glass control panel at  
the outside of the solarium. The customer can make  
his/her choice according to his/her preferences and  
take the time he/she needs to do it **before** tanning. I .e.  
relaxing sun bathing from the very start.

Additional to that, the recesses in the display can be  
touched easily – even with shut eyes and thus make  
further operation easy as 1, 2, 3.

**megaRelaxing!**
